OLD WORLD COLOR

Color plays a vitally important role in the world in which we live. When we look at art, fashion, automobiles, and interior décor we immediately experience an emotion from the colors projected. The color that is used on the exteriors of homes and buildings has this same effect - selecting the right stucco color accentuates building design and complements the other elements such as brick, stone veneers, siding, and trim.

The Stucco Color Collection was developed by color professionals who understand the importance of color and its impact. This Color Collection is the most demanded and readily available colors offered, but it doesn't stop there. Custom colors are also available through our on-demand custom color development service for all stucco finishes - we are stucco color specialists.

All colors are available in other finish and coating products such as Acrylic and Elastomeric Finishes, Coatings, Allegro II and FogCoat.

SELECT THE RIGHT BASE FOR THE CHOSEN COLOR:

LaHabra = Base 100 or 200

Note: Color will vary depending on type of finish selected. Application by machine spray or texturing will increase the depth of color. Variation in color due to weather, job conditions and method of application should be expected. For color verification, request a physical sample in the color and texture desired for approval prior to ordering material. Apply a sample of stucco to the substrate being used before proceeding with the application. LaHabra is not responsible for color correctness of applied finish. Color must be verified and approved by owner prior to application.
