Certificate Requirements for Parex USA Stucco Products Installers

Parex USA **FastWall 100, Armourwall 100, and TEIFS One Coat Stucco** are proprietary stucco products available for use in stucco applications that are not covered by generic stucco installation instructions. For this reason, Parex USA requires that these products be installed by applicators who have **a current listing certificate** from Parex USA, Inc. The listing certificate acknowledges that the applicator has attended the Parex USA education seminar for the product installation.

Parex USA **Fiber 47, Fiber47 Fastwall Scratch and Brown, and Fiber 47 Armourwall Scratch and Brown, Exterior Stucco Color Coat, and Premium Stucco Finish** are generic type stucco materials covered under the generic ASTM stucco application instructions. They do not require installers to have a listing certificate to apply them.
